

# 國立中山大學應用數學系

## 學術演講

講者：金芙蓉院士

Distinguished Professor of Mathematics and  
Computer Science, Paul Erdos Chair in  
Combinatorics, University of California, San Diego,  
USA

講題：The mathematics of ranking Web pages

時間：2014/03/25（星期二）11：10～12：00

地點：理學院四樓理 SC 4011 室

茶會：13:30 於理 SC 4010 室（系辦公室）

### 摘要

Methods for ranking Web pages were originally developed for designing Web search algorithms. These methods can be used to quantify various relationships in general graphs and are quite useful for dealing with numerous problems arising in various information networks. In addition to applications such as finding hot spots and identifying hidden patterns in social and biological networks, these ranking methods provide mathematical insight to the vast world of information networks that surround us.
