## 摘要

How scientific computing will shape the world tomorrow? What are the main challenges in scientific computing tomorrow? What are the trends to conduct researches in scientific computing tomorrow? What kind of computers we will use and develop for scientific computing tomorrow? What abilities will be needed in scientific computing industry tomorrow? What career paths you may have tomorrow if you work on scientific computing? I will illustrate partial and my personal views to these questions in the talk. At the same time, I hope this talk may convince some of the audience to start getting involved in scientific computing today.
